

We're asking for the community's help in maintaining the safety of patients, visitors and our healthcare team members.

- **Only healthy, essential visitors such as immediate family, partner or significant other ages 18 and older may visit patients.**
- **If possible, please limit visitors to one or two per patient.**
- **Patients in isolation will have additional visitor restrictions.**

If you would like to drop off a card, gift or message of encouragement, we are happy to deliver those to patients. You may also call a patient's room or visit patients using Facetime or another video communication app.

We appreciate the community's understanding and compliance.
